

Shepparton Branch

From our Branch Manager

Water Dynamics enjoys a proud history within the Shepparton region, with over 30 years' experience providing irrigation and water management solutions to our horticultural, broadacre, livestock and domestic customers.

Living and working within the 'food bowl of Australia' means we understand local conditions and challenges and have the relevant skills to provide the right products and technical advice to keep your irrigation system operating at peak efficiency.

At Water Dynamics Shepparton, we aim to be your most valued irrigation partner.

Sincerely

A handwritten signature in black ink, reading "Daniel Free".

Daniel Free

Branch Manager

agricultural land occupies 81%* of the Shepparton region with many high-value horticultural and agricultural products being produced, including milk, cattle, apples, pears, vegetables and cereal crops. In order to remain successful, water needs to be a sustainable commodity, making water-efficiency an essential ingredient to farm life within the region. Modern irrigation systems are both water-efficient and cost-effective, providing the exact amount of pressure and coverage, minimising water costs and waste.

Water Dynamics Shepparton is your irrigation modernisation specialist, with proven capabilities across horticulture, broadacre and livestock. Our team has the experience and expertise to deliver the best solution every time. We treat each project as unique and design and install each system based on its individual requirements.

Service and Repair

To keep irrigation systems performing at an optimal level, we recommend implementing a preventative maintenance program during off season to ensure peak performance when the irrigation season commences.

Our team of highly skilled technicians use their local knowledge to devise a maintenance program to meet the needs of each system, based on system usage and the surrounding environmental conditions.

However, even with a preventative maintenance program in place, minor issues or breakdowns can still occur. Our technicians can service and repair all brands of irrigation systems, even those not directly sold by us and are on-call outside business hours for emergency break-downs.

"Water Dynamics Shepparton is your irrigation modernisation specialist"

Solutions for...

Horticulture, viticulture and agriculture

• The Shepparton region produces 95%* of Victoria's pear produce, along with an impressive quantity of stone fruits, apples, and grapes for winemaking.

• We are specialists in orchard and vineyard irrigation, working with over 50 orchards each year to maximise quality yields.

• We can design, supply, install and maintain the most practical irrigation system for your broadacre requirements, including hydraulically driven centre pivot and linear irrigators, which utilise overhead sprinklers to distribute water. This type of system is synonymous with water conservation and ease of use, saving you time and money.

Livestock farms

• Water is a vital component for both the pastures and the animals. We design, supply, install and maintain systems unique to your environment, covering all aspects of livestock, including pasture irrigation, stock watering, feed production, facility cooling and water for dairy operations.

• We also specialise in the supply and service of a large range of pumps to complement the watering systems required.

Your home

• Water Dynamics has everything you need to achieve a healthy, lush lawn. From custom designed supply and install packages to DIY sprinkler systems and accessories. We have what you need to create a lawn and garden to be envied, whilst reducing your water usage and adding value to your home.
