

Irrigation and Water Management Specialists

ABOUT US

Water Dynamics specialises in the provision of Irrigation and Water Management services across industries that include **agriculture, government, industrial and residential**.

We provide water solutions from product selection and design to installation, service and repair.

We have a team of dedicated water specialists working with the latest water saving technologies. For many years our strategically located, Australia-wide branch network has provided our customers with local knowledge and service, with the support and buying power of a national business.

We are proud to have a strong partnership with **T-L Centre Pivots**, the world's only hydraulically driven centre pivot irrigator. Since the 1980s Water Dynamics has sold and installed over one thousand T-L Centre Pivots across Australia.

IRRIGATION PRODUCTS

At Water Dynamics we supply all of your irrigation needs from large irrigation systems down to irrigation accessories such as hoses and fittings.

Systems

Our range of Irrigation Systems ensure we have a solution for all environments where water delivery is essential. Our Irrigation Systems include **centre pivots and linear irrigators, drip irrigation, micro irrigation and traveling irrigators**.

Accessories

We supply a full range of Irrigation Accessories including **Valves, Tanks, Filtration, Pipes and Hoses and Fittings**.

Pumps

Whatever your application we have a Pump to meet your requirements. Our range includes **Submersible Pumps, Centrifugal Pumps, High Pressure Pumps, Multi-Stage Pumps, Pressure Systems, Turbine Pumps and Solar Pumps**. We also stock a large range of spare parts to assist in emergency situations.

Sprinklers

We provide a range of agricultural and domestic Sprinklers and work with our customers to maximise the benefits of sprinkler irrigation.

Water Management Tools

To complete our irrigation product range we also provide a full range of Water Management Tools including **Controls and Measurement Sensors**.

*We source Irrigation and Water Management products from of the world's leading water management companies including **T-L, Grundfos, Southern Cross, Onga, Davey and Irtec**.*

SYSTEM DESIGN

At Water Dynamics, we work with our customers to design and develop water delivery systems adapted to your topography, available water resources, climactic conditions, crop type and growing media.

By working with you to understand your exact needs, we can make recommendations for the right equipment and control systems best suited to your individual water requirements.

INSTALLATION

At Water Dynamics, we appreciate the importance of Irrigation Systems being installed and commissioned efficiently by skilled installers in accordance with various standards. This ensures Irrigation Systems perform optimally and in turn determines the expected life of the system.

We have a long history of successful installations from small domestic applications to large corporate operations.

In addition to our installation services, our Mt Gambier branch also offers bore drilling services.

SERVICE AND REPAIR

Water Dynamics provides complete service and repair solutions to complement our installation service. We understand the significance of ensuring your equipment has as little down time as possible. We offer all types of services from preventative maintenance programs to emergency repair services.

We operate modern workshops across Australia and are able to service all types and brands of irrigation and water equipment and pumps. We also provide a range of fabrication and welding services.

We also operate a fully equipped fleet of service vehicles, able to meet your service requirements on site wherever possible.
