

Yarrowonga Branch

## A message from our experienced team

With over 30 years of extensive irrigation knowledge in designing, quoting and installing irrigation equipment, from small home sprinkler systems to large broadacre and commercial installations, our experienced, friendly staff at Water Dynamics Yarrowonga can provide you an irrigation solution tailored to your needs.

We are specialists in T-L Hydraulic Centre Pivots and Linear Irrigation Systems, as well as being Onga Pump Shop certified.

Living and working within our community means we understand the unique local conditions and challenges, and we have the relevant skills to provide the right products and technical advice to keep your irrigation system operating at peak efficiency.

At Water Dynamics Yarrowonga, we aim to be your most valued irrigation partner.

**a**griculture makes up approximately 80% of the Yarrowonga branch footprint with many high value horticultural and agricultural products being produced locally, including milk, cattle and a wide variety of vegetables and wheat crops. In order to remain successful, water needs to be a sustainable commodity, making water efficiency an essential ingredient to farm life within the region. Modern irrigation systems are both water-efficient and cost-effective, providing the exact amount of pressure and coverage, minimising water costs and waste.

Water Dynamics Yarrowonga is your local irrigation modernisation specialist, with proven capabilities across horticulture, broadacre and livestock. Our team has the experience and expertise to deliver the best solution every time. We treat each project as unique and design and install each system based on its individual requirements.

## Service and Repair

To keep irrigation systems performing at an optimal level, we recommend implementing a preventative maintenance program during off season to ensure peak performance when the irrigation season commences.

Our team of highly skilled technicians use their local knowledge to devise a maintenance program to meet the needs of each system, based on system usage and the surrounding environmental conditions.

However, even with a preventative maintenance program in place, minor issues or breakdowns can still occur. Our technicians can service and repair all brands of irrigation systems, even those not directly sold by us and are on-call outside business hours for emergency break-downs.

*“Water Dynamics Yarrowonga is your local irrigation modernisation specialist”*

## Solutions for...

### Centre Pivot and Linear Irrigation

- Water Dynamics Yarrowonga is your trusted Pivot Partner. We have the longest standing relationship with T-L in Australia, and we've proudly been supplying and installing T-L pivots for over 30 years - at last count Water Dynamics have installed over 2,000 T-L pivots nationwide.
- Our range of centre pivots and linear irrigators are hydraulically operated, providing a huge range of benefits over traditional electric powered irrigators, including continuous drive and lower maintenance costs.
- We boast an extensive service radius from our branch headquarters allowing us to reach northern Victoria, the southern and central districts of New South Wales, as well as parts of the ACT.

### Commercial Turf and Landscapes

- Water Dynamics Yarrowonga has the knowledge and experience to support local landscapers, councils and various sporting grounds (such as golf courses and football fields) reduce water consumption and protect water quality in our public spaces.
- We proudly provide an array of services for commercial turf and landscape irrigation including expert advice, system design, product supply, system installation, service & repair and maintenance.

### Local Residential Irrigation

- Water Dynamics Yarrowonga has everything you need to achieve a healthy, lush lawn. From custom designed supply and install packages to DIY sprinkler systems and accessories. We have what you need to create a lawn and garden to be envied, whilst reducing your water usage and adding value to your home.
