

Mt Gambier Branch

A Message From Our Experienced Team

Water Dynamics enjoys a proud history within the Mt Gambier region, with over 30 years' experience providing irrigation and water management solutions to our horticultural, broadacre, livestock and domestic customers.

Being the largest irrigation provider in Mt Gambier allows us to effectively support the community and many local organisations. We understand local conditions and challenges and have the relevant skills to provide the right products and technical advice to keep your irrigation system operating at peak efficiency.

At Water Dynamics Mt Gambier, we aim to be your most valued irrigation partner.

mount Gambier is located within the South-East region of South Australia. Agricultural land occupies 74% of the region with many high-value horticultural and agricultural products being produced, including cattle, wine, sheep, wool and wheat. In order to remain successful, water needs to be a sustainable commodity, making water efficiency an essential ingredient to farm life within the region. Modern irrigation systems are both water-efficient and cost-effective, providing the exact amount of pressure and coverage, minimising water costs and waste.

Water Dynamics Mount Gambier is your local irrigation modernisation specialist, with proven capabilities across horticulture, broadacre and livestock. Our team has the experience and expertise to deliver the best solution every time. We treat each project as unique and design and install each system based on its individual requirements.

Service and Repair

To keep irrigation systems performing at an optimal level, we recommend implementing a preventative maintenance program during off season to ensure peak performance when the irrigation season commences.

Our team of over 15 highly skilled technicians use their local knowledge to devise a maintenance program to meet the needs of each system, based on system usage and the surrounding environmental conditions.

However, even with a preventative maintenance program in place, minor issues or breakdowns can still occur. Our technicians can service and repair all brands of irrigation systems, even those not directly sold by us. They're on-call outside business hours for emergency break-downs.

“Water Dynamics Mt Gambier is your irrigation modernisation specialist”

Solutions for...

Bore Drilling

- With a strong history of bore drilling in Mt Gambier and surrounding areas, we are proud to be one of a few irrigation companies capable of handling every step of a whole irrigation project from start to finish.
- Highly skilled in bore drilling for residential water, stock water and broadacre and vineyard irrigation, we drill bores up to 300mm wide and 250m deep utilising our truck mounted Bourne Drilling Rig.
- Our skilled technicians are able to meet a large range of service requirements including extracting damaged bore pumps and repairing and reinstalling back into the bores.

Broadacre

- We provide a wide range of agricultural irrigation solutions including centre pivot irrigation, travelling irrigators and drip irrigation across all types of crops and pastures.
- With a dedicated T-L centre pivot team, Water Dynamics Mount Gambier can provide expert design, supply, installation and maintenance of customised irrigation systems to all our broadacre customers. We consider factors including soil types, climate, water source, water emission rate, as well as your individual priorities in designing a system suited to your needs.

Your home

- Water Dynamics Mount Gambier has everything you need to achieve a healthy, lush lawn. From custom designed supply and install packages to DIY sprinkler systems and accessories. We have what you need to create a lawn and garden to be envied, whilst reducing your water usage and adding value to your home.
