

A Message From Our Experienced Team

Water Dynamics enjoys a proud history within the Mildura region, with over 150 years' combined experience providing irrigation and water management solutions to our horticultural, livestock and domestic customers.

Having the largest range of irrigation supplies allows us to effectively assist in all of your irrigation needs. Being experts in horticulture irrigation, we aim to ensure farmers are delivering consistent quality produce in the most cost effective means possible.

At Water Dynamics Mildura, we aim to be your most valued irrigation partner.

mildura is located within the North West region of Victoria, where agricultural land occupies 67% of the region. Known as the centre of Victoria's Food Bowl, many high-value horticultural and agricultural products are produced in the region, including grapes, sheep, citrus fruits, almonds and vegetables.

Water Dynamics Mildura is your irrigation modernisation specialist, with proven capabilities across horticulture and broadacre. Our team has the experience and expertise to deliver the best solution every time. We treat each project as unique and design and install each system based on its individual requirements

Service and Repair

To keep irrigation systems performing at an optimal level, we recommend implementing a preventative maintenance program during off season to ensure peak performance when the irrigation season commences. Our team of highly skilled technicians use their local knowledge to devise a maintenance program to meet the needs of each system, based on system usage and the surrounding environmental conditions.

However, even with a preventative maintenance program in place, minor issues or breakdowns can still occur. We have a fully equipped fleet of service vehicles, able to meet your service requirements on-site wherever possible. By bringing skilled mobile service technicians to your site promptly, Water Dynamics Mildura can help you get your equipment back up and running in no time.

“Water Dynamics Mildura is your irrigation modernisation specialist”

Solutions for...

Horticulture and agriculture

- The Mildura region produces a large volume of fruits and vegetables each year, with the main three being carrots, asparagus and melons (24%, 23% and 11% of total Australian production respectively).
- With extensive expertise in irrigation in and around Mildura, we are specialists in citrus, grape, vegetable and nut irrigation. We work closely with a wide range of horticulture farmers to design cost-effective irrigation systems that drive consistent and quality produce.
- We have extensive experience in designing, supplying and installing the most practical irrigation system for all types of horticulture. With a focus on saving you time and money, our knowledgeable technicians work hard to ensure your system is up and running perfectly in time for peak harvest season.

Viticulture

- Known for its impressive grape production, the Mildura region produces 98% of Australia's dried grapes, 75% of all table grapes grown in Australia and contributes up to 20% of the national crush.
- Water Dynamics are experts in designing irrigation systems for vineyards and are able to design and supply customised irrigation systems, upgrades, overhauls and expansions.

Local Residential Irrigation

- Water Dynamics Mildura has everything you need to achieve a healthy, lush lawn. From custom designed supply and install packages to DIY sprinkler systems and accessories. We have what you need to create a lawn and garden to be envied, whilst reducing your water usage and adding value to your home.
