

Darwin Branch

From our General Manager

Water Dynamics enjoys a proud and well-respected history within the Northern Territory, with over 30 years' experience providing irrigation and water management solutions to our agricultural, commercial and residential customers.

Living and working within our unique region means we understand local conditions and challenges, and have the relevant skills to provide the right products and technical advice to keep your irrigation system operating at peak efficiency all year round.

At Water Dynamics Darwin, we aim to be your most valued local irrigation partner.

Sincerely

Jimmy Osborne
General Manager, Water Dynamics Darwin

Water Dynamics Darwin is your Territory tough irrigation modernisation specialist, with proven capabilities across a wide variety of local industries. Our team has the experience and expertise to deliver the best solution first time, every time. We treat each project as unique and design and install each system based on its individual requirements and our customers' specific needs.

Our Water Dynamics Darwin team includes a blend of product experts, irrigation designers and installers. Our staff are very well known in the industry and some have previously even owned and operated their own landscaping and irrigation businesses. We pride ourselves on good old-fashioned customer service so you know you'll get the personal attention you're looking for when you work with us on a project, or come into store.

Service and Repair

To keep irrigation systems performing at an optimal level, we recommend implementing a preventative maintenance program during off season to ensure peak performance when the irrigation season commences.

Our team of highly skilled technicians use their local knowledge to devise a maintenance program to meet the needs of each system, based on system usage and the surrounding environmental conditions.

However, even with a preventative maintenance program in place, minor issues or breakdowns can still occur. Our technicians can service and repair all brands of irrigation systems, even those not directly sold by us, and are experts in getting you back up and running as soon as possible following an emergency breakdown.

"Water Dynamics Darwin is your Territory tough irrigation modernisation specialist"

We are specialists in...

Agriculture and Horticulture

- The agribusiness sector in the NT is dominated by the cattle industry (44%) and the horticulture industry (30%)*.
- Water Dynamics Darwin are your local specialists for all livestock applications. Whether you are rearing cattle, pigs, sheep or poultry we have a solution to suit your farms unique watering requirements.
- In addition we can design, supply, install and maintain the most practical irrigation system for your horticulture requirements. Farmers trust Water Dynamics Darwin to place as much value on irrigating their crops as they would. From mangoes to melons, and everything in between, our irrigation solutions are synonymous with water conservation, and ease of use - saving you time, and money.

Residential and Commercial Turf

- Water Dynamics has everything you need to achieve a healthy, lush lawn, commercially, or at home. From helping local councils create sustainable public spaces, to DIY sprinkler systems and accessories for the home owner, we have the experience and know-how to create a lawn and garden to be envied, whilst reducing water usage and adding value to your home or garden.

Bore and Pumping applications

- Water Dynamics Darwin has a local, dedicated Bore Pump team on hand who are expertly trained in supplying, installing and maintaining bores across the entire Northern Territory, including mine sites.
- We specialise in the supply and service of a large range of pumps and pumping systems to complement any watering application, and we only use well-known and industry respected brands such as Calpeda and Grundfos.
