

CAPABILITY STATEMENT
Service and Repair

Industry leading Irrigation Brands

Water Dynamics service, repair and install all types and brands of irrigation systems. These include pivots, linear irrigators, pumps, filtration systems, pop-up sprinkler systems, drip irrigation systems, water meters, solenoid valves, irrigation controllers, spray and micro-spray systems and much more. We service the agriculture, government, commercial turf, mining and residential markets, just to name a few.

Regardless of the make or model of your equipment, each one of our store locations has the ability to tailor the most suitable service solution to meet your schedule, budget and environmental conditions. Our vehicles are stocked with many parts. We only use the best quality brands for our work, we use well-known and industry respected brands including T-L, Southern Cross, Stalker, Grundfos, Onga, Davey, Bermad, Philmac, IPLEX, Vinidex, Netafim, Rivulis, Nelson, Hunter, Toro and Rainbird.

**Did you
know we
service most
major makes and
models of pivot
irrigators?**

***“At Water Dynamics we
aim to be Australia’s most
valued irrigation partner”***

Irrigator Pivot Service & Repair

As Australia's number one supplier of T-L centre pivot and linear irrigators, Water Dynamics' service technicians are highly experienced in essential routine maintenance, emergency breakdowns and repairs of centre pivots, linear irrigators including electric pivots. Our long-standing relationship with T-L has ensured we have vast knowledge and experience in all facets of T-L irrigators. We offer a comprehensive, competitive installation service with the sale of all new irrigators, our experienced service technicians install all types of systems.

Some of our T-L centre pivot and linear irrigator maintenance services include:

- Structural inspection
- Lubricant level checks and grease points serviced
- System and tyre pressure checks
- System alignment
- Hydraulic filter replacement
- Sprinkler and regulator inspection
- Safety system operation
- Inspection of electrical components and wiring
- Driveline service and maintenance
- Optional pump station inspection and service

Water Dynamics' fully stocked national T-L warehouse guarantees immediate response on all T-L spare parts for our customers country wide. With over \$1 million of spare parts inventory on hand and a full T-L machine you can trust Water Dynamics has your comprehensive irrigation services covered.

Pump Service & Repair

Water Dynamics stock, supply, install, service and repair a wide range of pump types and brands. Our fully equipped workshops have been designed to dismantle, repair and test pumps from industry leading brands such as Southern Cross, Grundfos, Onga, Davey, Stalker and more.

Our pump service capabilities include:

- Onsite & offsite servicing
 - Troubleshooting and spot assessments
 - Routine maintenance service contracts

We offer residential customers a temporary pump to minimise impact on households. With these just being a part of the comprehensive service offerings we pride ourselves on, Water Dynamics remain committed to bringing our customers excellent pump service.

Pipe Installation & Repair

- Trenching, pipe laying including welding and repair
- Electro fusion welding
- HDPE butt fusion welding

Sprinkler System Service & Repair

From a garden pop up sprinkler to a sprinkler drip system for a vineyard; Water Dynamics can provide a complete design, installation and repair for all irrigation systems as well as any industrial and domestic filters.

Bore Drilling & Installation

Water Dynamics offer a comprehensive range of bore services, from pre-assessment all the way to ongoing service and repair. Our skilled teams of service technicians in Darwin and Mount Gambier specialise in a wide range of service requirements including extracting damaged bore pumps, repairs and reinstallations back into the bores as well as routine maintenance.

Our Mount Gambier branch boasts a 250km service radius, servicing the South East of South Australia across to the Western districts of Victoria. As one of the largest irrigation providers in the region, Water Dynamics Mount Gambier are experts in bore drilling and maintenance and boasts a team of 30+ experienced service technicians.

Similarly, our Darwin branch are one of the few irrigation providers in the Northern Territory who are capable of handling the entirety of a bore project. Our dedicated Darwin bore pump team have amassed over 30 years' industry experience supplying, installing and maintaining bores that are Territory tough.

Preventative Maintenance Programs

To keep irrigation systems performing at an optimal level, we recommend implementing a preventative maintenance program ensuring peak performance of your irrigation system.

Our irrigation experts work closely with you to tailor the most effective routine maintenance program specific to your site requirements.

Our team of highly skilled technicians use their local knowledge to devise a maintenance program to meet the needs of each system and the surrounding environmental conditions. From pivots to pump stations and sporting fields Water Dynamics does it all!

With a routine preventative maintenance program in place minor issues or breakdowns can still occur, it is critical that regular maintenance occurs minimising any potential breakdown risks. Our technicians can service and repair all brands of irrigation systems, even those not directly sold by us. We are also on-call outside business hours for those emergency break-downs.

About our Service and Repair Capabilities

Water Dynamics know how crucial it is to keep your irrigation systems running smoothly, that is why we are proud to offer a complete range of reliable irrigation repair and maintenance services. With expertise across all types and brands of irrigation systems and industries, each one of our branches are well equipped with experienced staff and resources to deliver the most suitable service solution to meet your environmental conditions, budget and timeframe.

Onsite maintenance and emergency repairs are made possible with our dedicated teams of skilled mobile technicians across our branches nationwide. Each one of our branches are supported with fully equipped workshops that are stocked with a large range of spare parts.
