

About Water Dynamics

For over 30 years Water Dynamics have been part of the Australian landscape. From backyards to regional Australia, Water Dynamics has the experience and expertise to ensure the perfect solution across all areas of irrigation and water management.

Water Dynamics has everything you need to achieve a healthy, lush lawn. From custom designed supply and install packages to DIY sprinkler systems and accessories, we have what you need to create a lawn and garden to be envied, whilst reducing your water usage and adding value to your home.

We pride ourselves on our strong irrigation system design skills and are able to provide advice on projects big or small, across a broad spectrum of industries. We have completed some amazing projects over the years and use this experience to provide our clients with the best possible solution.

At Water Dynamics, we aim to be Australia's most valued irrigation partner.

Our Products

Controllers

Our range of domestic and industrial controllers are designed to provide greater control over when you apply water and how much water is applied, allowing for high levels of efficiency in water, energy and chemical applications.

Drip Irrigation

A highly water-efficient method, drip irrigation slowly applies water to the root of a plant, maintaining the ideal moisture level in the soil at all times. Drip irrigation prevents common water loss due to the sun and wind and also irradiates water loss due to irrigating non-growth areas.

Filtration

Our range of domestic and irrigation filters have been designed to prevent blocking due to soil, water or air contaminants, reducing costly replacements and unnecessary downtime.

Micro Irrigation

Micro irrigation is an efficient, low pressure irrigation method which applies water slowly and directly to the root zone. The water is applied over a larger area than drip irrigation allowing for roots to spread out.

Pumps

We stock a diverse range of pumps to cover the requirements of irrigation, residential, commercial and agricultural applications from a wide range of leading pump brands.

Sprinklers

We design, supply, install and repair a wide range of sprinkler systems, including pop-up spray sprinklers, pop-up rotor sprinklers, impact sprinklers and micro sprinklers. Our systems are water efficient and provide an even application of water, making them suitable for homes, golf courses, public spaces and crop irrigation.
